1. The simplest example

Loading the `tgheros` package in the document preamble sets TEX Gyre Heros as a sans-serif typeface, i.e., the typeface associated with the `\sffamily` command. This does not cause the entire document to be typeset in this typeface, but it will be used when the commands `\sffamily` (as below), `\textsf` or `\sf` are used. Heros has a condensed version, which can be invoked using the `condensed` package option.

For changing `\rmfamily` and `\ttfamily`, see the demos of the TEX Gyre Termes and TEX Gyre Cursor typefaces.

When typesetting in Polish using classical TEX and pdfLATEX, it is necessary to enable T1, QX, or OT4 font encoding (preferably using the `polski` package). For example:

```
\usepackage{tgheros}
\usepackage[T1]{polski}
```

When using Unicode engines (XeLATEX and luaLATEX), an encoding that provides access to all glyphs of the typeface is applied automatically; the following preamble is sufficient:

```
\usepackage{tgheros}
\usepackage{polski}
```

Some TEX Gyre typefaces, when used together, may appear to have different sizes. This can be adjusted with the `scale=` package option, which allows setting the typeface scale. The options `matchlowercase` (which sets the scale so that the x-height of the loaded typeface matches that of the main document typeface) and `matchuppercase` (analogously for uppercase letters) are also convenient. A reasonable way to load the Termes–Heros–Cursor trio is as follows:

```
\usepackage{tgtermes}
\usepackage[matchlowercase]{tgheros,tgcursor}
```

Here is the TEX Gyre Heros typeface. Zielone kalafiory Jagiełły **nie *gryzmolizują*** namiętnej śpiewaczki **chóru BOSTOŃSKIEGO** w sposób przekraczający *wyobrażenie* o repartycji impregnatów rywalizacji cenowej w społeczeństwie postindustrialnym. To *DZIWNE*!

Using LATEX commands, many symbols can be obtained, for example: © 1058 ℘•№ ¼ µm

Here is the TEX Gyre Heros Condensed typeface. Zielone kalafiory Jagiełły **nie *gryzmolizują*** namiętnej śpiewaczki **chóru BOSTOŃSKIEGO** w sposób przekraczający *wyobrażenie* o repartycji impregnatów rywalizacji cenowej w społeczeństwie postindustrialnym. To *DZIWNE*!

Using LATEX commands, many symbols can be obtained, for example: © 1058 ℘•№ ¼ µm

2. Access to other TEX Gyre typefaces

If there is a need to mix several typefaces, they can be activated with the following commands:

```
and obtain {\fontfamily{qbk}\selectfont
  fragment typeset in \TeX\ Gyre Bonum}
```

and obtain fragment typeset in TEX Gyre Bonum with a different main typeface.

Here are all TEX Gyre typefaces:

code	typeface name	similar to
qag	TEX Gyre Adventor	Avant Garde Gothic
qbk	TEX Gyre Bonum	Bookman
qzc	*TEX Gyre Chorus*	Zapf Chancery
qcr	TEX Gyre Cursor	Courier
qhv	TEX Gyre Heros	Helvetica
qhvc	TEX Gyre Heros Condensed	
qpl	TEX Gyre Pagella	Palatino
qcs	TEX Gyre Schola	Century Schoolbook
qtm	TEX Gyre Termes	Times New Roman
